(10

****

I am directed to forward for the information of H.E. the Governor / the information of H.H. the Lieut. / your information in Council, / Governor (in Council) and for favour of necessary action a copy of a letter from the India Office No. I.S.516/19, dated the 15th April 1919, on the difficulty experienced by Indian students who have recently arrived in England for the study of medicine in securing admission to a Medical School, owing to the demobilization and return to their studies of large numbers of English students.

****

Copy of the India Office letter No. I.S.516/19, dated the 15th April 1919, to the Secretary to the Government of India, Home Department.

****

Several Indian students have recently arrived in this country for the study of medicine and have experienced great difficulty in securing admission to a Medical School, owing to the demobilization and return to their studies of large numbers of English students.

It would appear that these students, who had not obtained any medical qualification in India, were given preference over other applicants for passages to England, whereas other students, including one or two Government Scholars, for whom admission to Educational Institutions in this country has been arranged, have not yet been able to leave India on account of the difficulty they have experienced in securing passages to England. To save disappointment to students coming here for admission to Medical Schools, it seems desirable to draw your attention to the matter, and to suggest that, so long as the present pressure on steamship accommodation continues, there is not sufficient ground for giving preference in the matter of passages to medical students, unless they can show that definite arrangements have been made for their admission to an Educational Institution in this country, or that they

(4

have already obtained, in India, qualifications which will enable them to take up post-graduate work on their arrival in England.

Owing to the large number of applications now being received by the London Medical Schools from students demobilized from the Army and Navy, it is practically certain that for the present, admission will be obtainable for Indian students who have not already qualified in India, and although the position may be easier at the provincial Medical Schools there is no doubt that the chances of an Indian student being successful in an application for admission to a Medical Faculty are very much better if he has obtained in India qualifications which will enable him to become a post-graduate student on his arrival here. At present any Indian student who has only partly completed his course in India would be much better advised to obtain his qualification there before seeking admission to a Medical School or Faculty in this country.

I should add that there is, of course, no desire or intention to discourage Indian students from coming to the United Kingdom for the study of medicine; but, owing to the present crowded condition of Medical Schools and Faculties here, it is only in their own interest that they should secure promises of admission before leaving India.
